**AMERICAN®
METAL WARE**

2019

Product Catalog

Celebrating over 125 years of integrity, industry, and innovation.

Last year, as we celebrated the 125th anniversary of the founding of American Metal Ware, we reflected upon how the international company we are today started in 1865, when a 14-year old boy from Germany immigrated to Chicago to apprentice as a tin- and coppersmith.

For over a decade, he learned his craft, mastered techniques, and then began innovating. When he founded American Metal Ware in 1893, advanced machinery was designed to produce a wide assortment of hot water, coffee, and tea urns, while preserving the quality and workmanship of the handcrafted originals.

By upholding these principles of integrity, industry, and innovation, Grindmaster-Cecilware has become an established market leader. We are proud that our brands, Grindmaster, Cecilware, Crathco, and American Metal Ware have made significant contributions to the history and evolution of the beverage and foodservice industry.

We continue to pioneer, offering an unparalleled selection of quality professional beverage and foodservice equipment to best serve our customers' needs. From appetizer to after-dinner coffee, our mission is to help your business become easy, successful, and profitable.

Grindmaster-Cecilware is now a proud member of the Electrolux family, and maintains its worldwide distribution center and customer care network in Louisville, Kentucky, with manufacturing locations in Louisville and Thailand, serving customers across the globe.

Simplicity[®] Bubblers[®]

Less Equals More

Less counter space with their compact size.
Less time and effort in cleaning and disassembly.
Less wear and power usage.
Less waste, with product dispensed to the last drop.
Less worry with fewer removable parts.
And, less maintenance.

Which we believe gives you much, much more.

See Page **153** for more

ORDERING INFORMATION

Important Information When Ordering Equipment

Credit Terms:

- Net 30 days from date of invoice with approved credit application. 1% discount for payment in 10 days. Credit applications for open accounts normally take 10 working days for approval unless rated by Dun and Bradstreet as high or good.
- We welcome MasterCard®, Visa®, and American Express®.
- Customers without open accounts are required to send payment in advance or pay by credit card. A cashier's check or money order can be accepted. No C.O.D. orders.
- Minimum order is \$40 list price.
- No goods can be returned for credit without our prior written consent and return goods authorization, and will be subject to a 30% re-stocking charge and return shipping costs.

Freight:

- All equipment orders, on a single PO, of \$5,000 net invoice or more to a single destination in the contiguous U.S. are freight prepaid ground shipping only by Grindmaster-Cecilware.
- Prices subject to change without notice. Check www.gmcw.com for current pricing or contact Customer Service at 1.800.695.4500.
- Product availability subject to change. Contact customer service for current product availability at 1.800.695.4500.

Catalog Specifications:

- Images, renderings, and photographs are meant to be representative of the Grindmaster-Cecilware products and may not depict existing or proposed improvements. In keeping with Grindmaster-Cecilware's policy of constant innovation and advancement, the products pictured in this catalog may vary slightly from the actual delivered product and are not meant to be exact representations of the same.
- Product specifications are subject to improvement or change.
- Supersedes all previous price lists.

Installation Recommendations:

- 120/240 electrical designation may require power supply to provide both 120V and 240V. Contact factory for model-specific information.
- Conversion orifices are not available for gas-fired products already in service. Per ANSI / CSA Z83.11-2006, conversion orifices must be included with the appliance.
- Water connections must be per applicable federal, state, and local codes. Your local installer and /or the plumbing inspector can provide guidance.

Product Certifications:

- For a complete listing and description of the independent certifications and marks referred to in this catalog, please see page 232.

COFFEE GRINDERS

100 and 250 Series Coffee Grinders

Years of Proven Performance and Reliability

The 100 and 250 series coffee grinders are economical, dependable workhorses featuring exclusive, long-lasting granulating-style burrs to assure consistent throws.

- Excellent bean visibility.
- Adjustable range of grind profile settings.
- Powerful, energy-efficient 0.5 hp motor.
- Circuit breaker with manual reset button.
- Troubleshooting guide decals with toll-free phone number affixed to the back of each grinder.
- Burrs guaranteed to process 40,000 pounds of coffee at medium grind.
- Exceptional warranty program: burrs - 4 years or 40,000 lbs. of coffee, all other components - 2 years.

100 Series

Solid-state, concealed, dual range timer.

250 Series

Digitally controlled with internal LED display.

GRINDMASTER®

COFFEE GRINDERS : RETAIL
800 Series Coffee Grinders

Compact and Powerful

Don't let their size fool you. The 800 series coffee grinders may seem unassuming with their space-saving size of only 7" - 8" wide. But these little guys use their fast grind speed and powerful, energy-efficient 0.5 hp motor to make quick work of coffee beans.

- Motor includes circuit breaker.
- Multiple grind particle profile selections.
- Ideal for low to medium volume specialty shops, grocery stores, doughnut shops, and c-stores.
- Precision burrs guaranteed to process 40,000 lbs. of coffee at medium grind.
- Exceptional warranty program: burrs - 4 years or 40,000 lbs. of coffee, all other components - 2 years.

WATER PURITY

Purity C500 Water Filter Starter Kit

Start Here for Great Water

The complete kit to test and produce clearer, cleaner, great tasting water. Begin with the included water hardness testing kit, and then set the adjustable bypass from 0 to 70% to produce exactly the water you need - minimizing scale, and retaining minerals that benefit taste.

Four-step filtration for clearer, cleaner, great tasting water:

1. Prefiltration: Removes coarse particles.
 2. Temporary Hardness Reduction: A hydrogen ion exchanger reduces the temporary hardness content and prevents scale deposits.
 3. Activated Carbon Filtration: Improves taste and odor.
 4. Fine Filtration: Retains small particles.
- Reduces hardness, alkalinity, and TDS.
 - Prevents limescale deposits in equipment.
 - Removes particulates, along with metal ions, such as lead or copper.
 - Eliminates impurities like chlorine that affect the taste, aroma, and quality of water.
 - Decreases service and repair costs.
 - All of the water – including the bypass water – runs through an activated carbon filter, resulting in the removal of substances that have an adverse effect on the taste and aroma.
 - Decarbonation filter with weak acid cation (WAC) resins replace the hardness minerals (calcium and magnesium ions) with hydrogen ions for a saltless softening.
 - Easy-to-use Locking System - remove and replace the filter cartridge quickly and easily.
 - Chlorine reduction: minimum removal of 85.2%, average removal of 88.6%.
 - Operates in horizontal or vertical position.

Purity C500 Water Filter Starter Kit

Model	250-00011
Description	Includes filter, water hardness test kit, and filter head with variable bypass adjustable to local water conditions.
Capacity	1,796 gallons at 40% bypass (10 gpg) 3,555 gallons at 70% bypass (4 gpg)
Flow	Nominal Flow: 26.4 gph Rated Service Flow: 0.44 gpm
Plumbing	3/8" 18 NPT connections. Maximum operating pressure of 8.6 bar/125 psi.
Product Dimensions (H x W x D)	Filter head and cartridge: 22" x 6" x 6"
Ship Dimensions (H x W x D)	27.5" x 7" x 7.25"
Product Weight	Dry Weight: 10.1 lbs. Wet Weight: 15.2 lbs.
Ship Weight	13 lbs.
List Price	\$ 547

Optional Replacement Filter

Model	250-00012
Description	Replacement Filter Cartridge for Purity C500 water filter
Product Dimensions (H x W x D)	19" x 4.5" x 4.5"
Ship Dimensions (H x W x D)	6.5" x 6.5" x 23.25"
Ship Weight	10 lbs.
List Price	\$ 413

Note: Water operating temperature: 39.2° - 86°F. Room operating temperature: 39.2° - 104°F.

GRINDMASTER®

Space Saving Water Filter System

Cover Your Basic Filtration at the Exact Point of Need

Get the benefits of both water softener and dual-purpose carbon filter in this single-mounting system. Convenient and compact, the water softener reduces hardness, mineral build-up, and scale deposits that can damage your machine, while the dual-action carbon filter removes impurities such as fine sediment, dirt, rust, THMs, VOCs, and pesticides, and reduces impurities like chlorine that affect the taste, aroma, and quality of water.

- Mounted in series, for installations where space is limited.
- Pressure-relief button on the inlet side relieves housing pressure during cartridge changes.

Water Softener Filter

Designed to allow optimal contact between water and bed of FDA-grade softener resin, ensuring maximum ion exchange.

- Flow Rate: 0.5 gpm
- Temperature Rating: 40°F -100°F

Dual-purpose Carbon Filter

Extremely fine filter protects against impurities down to 5 microns nominal, which removes THMs, VOCs, and pesticides.

- Flow Rate: Maximum flow rate of 2,500 gallons @ 2.5 gpm
- Temperature Rating: 40°F - 125°F

Note: This filtration system cannot be used with twin 1.5 gallon coffee brewers.

Space Saving Water Filter System

Optional Replacement Cartridges

Model	60206	60253	60254

GRINDMASTER®

WATER PURITY

RC400 Water Filter System

Water Filter System for RC400 Single Cup Brewers

Water Softening and Scale Protection

Effectively filters dirt, extra-fine particles, and cloudiness, and reduces limescale, and chlorine taste and odor.

- Provides 5 Micron Water Filtration
- Treatment of hardness up to 6 Grains Per Gallon
- Flow Rate: 1.5 gpm
- Temperature Rating: 35°F - 100°F
- Capacity: 3,000 gallons
- Working Pressure: 10 - 125 psi
- Great RO pre-filtration

Model	250-00034
Description	Water filter kit contains all needed hardware and filter for application to the RC400 Single Cup brewer
Product Dimensions (H x W x D)	12" x 4" x 4"
Ship Dimensions (H x W x D)	12" x 12" x 6"
Ship Weight	2 lbs.
List Price	\$ 265

External Bottled Water Pump Kit

Provides Water Wherever You Are!

For remote locations where a water supply is inaccessible, this portable and compact point-of-use pump dispenses purified water from five gallon bottles.

- Quick-connect ports allow assembly of system and connection in seconds.
- Built-in back-flow prevention.
- Long-life motor ensures years of reliable operation.
- Illuminated on/off switch provides clear visibility.
- Quiet operation with noise-dampening rubber feet.
- Thermal overload protection prevents overheating.
- Auto shut-off when the water source is depleted and restarts when water is restored.

Model	63174
Description	Includes main module with on/off rocker switch, single-inlet suction wand and hose assembly with universal seal cap, 20 feet of 0.25" discharge tubing, fittings kit, wall power transformer.
Flow Rate	0.5 gpm
Plumbing	0.25" flare outlet, 0.375" barbed inlet. Maximum pressure 40 psi.
Electrical	115V / 50/60 Hz / 1.2A NEMA 1-15P line cord included.
Product Dimensions (H x W x D)	Control Box: 3" x 5.1" x 7.6" Suction Wand: 23" length (4" extends past the top of the bottle)
Ship Dimensions (H x W x D)	24" x 10.5" x 3.25"
Product Weight	4.5 lbs.
Ship Weight	6 lbs.
List Price	\$ 418

COFFEE GRIND AND BREW SYSTEMS

Single Hopper Grind'n Brew Coffee System

Grinder and Brewer in One

This unique, space-saving design combines a precision coffee grinder and brewer into one machine in just over 9" of counter space, eliminating the need for separate machines.

- Digitally controlled with PrecisionBrew® Technology.
- Precise brew temperature - brewer will hold the brew temperature to +/- 1°F during the complete brew cycle.
- Single 5.5 lbs. bean hopper.
- Stainless steel brew basket.
- Bean usage counter - controller records volume of beans used from the hopper.

COFFEE BREWERS : SINGLE SERVE COFFEE BREWERS
RC400 Single Serve Coffee Brewers

Authentic Flavors of the World, One Cup at a Time

Brew great tasting single serve beverages with the stylish, powerful, and easy-to-use RC400. Compatible for use with any single-serve capsule, including RealCup™ and K-Cup®. Pulse brew and pre-infusion are optimized for coffee, tea, and cocoa, and the patent-pending brew chamber ensures even water distribution for full flavor every time.

- Plumbed in and pour-over capable right out of the box.
- 72 oz. cold water reservoir.
- Large touchscreen and easy-to-use one-touch controls.
- Digital control makes selection of beverage type and size simple.
- Faster brew with no lag time.
- More operator settings, including resettable brew count and customizable default options.
- Six brew size options from 4 oz to 16 oz. provide user with the selection of their choice.
- Adjustable platform for oversized travel mugs.
- Patented brew chamber ensures even water distribution for full flavor every time.
- Energy save mode engages at a programmed time of day, or when brewer has been inactive.
- Added safety with locking brew chamber.
- Commercial grade parts ensure a long life in heavy-usage locations.
- Repairable machine with available replacement parts.

COFFEE BREWERS : DIGITAL AIRPOT COFFEE BREWERS
PrecisionBrew® Digital Airpot Brewers

Lasting Warmth

Digitally controlled with PrecisionBrew® Technology. The brewer holds the brew temperature to +/- 1° F during the complete brew cycle.

- Brews into airpots (sold separately).
- Airpots hold freshly brewed coffee for hours without additional heat.
- Pour-over capability – automatically converts to pour-over mode when the control system does not sense water.
- Low temp/no brew allows the brew cycle to begin only when the water has reached the optimum brew temperature.
- Energy-saving 'sleep mode' feature.
- Dual voltage – brewers are field convertible from 120V to 120/208V and 120/240V.
- Pulse brewing / pre-infusion allows the brew sequence to extract up to 20% more dissolved solids per batch of coffee.
- Programmable features include number of pulses, pulse-on time, and pulse-off time.
- Changing the pulse sequence does not affect the brew volume.
- Stainless steel brew basket.

Model	B-SAP (AB-SAP)
Description	Single, digitally-controlled 2.2 L airpot brewer
Plumbing	0.25" flare water line at 30-80 psi required
Electrical	120V / 1.8 kW / 60Hz / 1 Ph 120/240V / 3.5 kW / 60Hz / 1 Ph 120/208V / 2.6 kW / 60Hz / 1 Ph NEMA 5-15P line cord included.
Product Dimensions (H x W x D)	25.25" x 8.25" x 17.75"
Ship Dimensions (H x W x D)	30" x 13" x 27"
Ship Weight	35 lbs.
List Price	\$ 1,176

Note: Airpots sold separately, see pages 60-62. Accessories available on pages 64-66.

COFFEE BREWERS : SHUTTLE® COFFEE BREWERS
PrecisionBrew® Coffee Solutions

Not a refinement. A revolution.

Meet the next generation of PrecisionBrew Shuttle coffee brewers. Evolved, modern design, innovative new features, advanced touchscreen digital interface, and the latest sensor technology provide simplified and streamlined brewing, and delicious beverages. 12 different models available to accommodate any coffee program. PrecisionBrew is the brewer you want it to be.

Visit www.PrecisionBrew.com for more information.

PrecisionBrew® Coffee Solutions

COFFEE BREWERS : SHUTTLE® COFFEE BREWERS
PrecisionBrew® Coffee Solutions

A Touchscreen Digital Interface

The PrecisionBrew family of coffee brewers are all equipped with advanced touchscreen digital interfaces - 7" color displays with intuitive, icon-driven menus for brewing and operation. Multiple recipe selections, interactive diagnostics, programmed brewing, and attractive, eye-catching merchandising for your machine are all available through the straightforward, easy-to-understand interfaces, keeping the whole process smooth and easy.

B Encapsulair™

The First-in-Industry technology Encapsulair found in the PrecisionBrew Air-heated models, uses the insulating power of air between its internal chambers to surround and protect your brewed coffee. The Encapsulair Shuttle maintains your coffee's temperature and flavor, giving you consistent quality and satisfied customers while reducing wasted beverages.

C Java-tate™

The Java-tate feature gently stirs the coffee at regular, short intervals to keep undissolved particles in suspension, ensuring a consistent flavor profile from the first cup to the very last. Customers can see the blending through the clear sight glass on the front of the machine. Only available in Encapsulair shuttles.

D Virtual Sight Glass

The backlit, internal sight glass in the Encapsulair shuttle provides an LED readiness and freshness indicator for the brew. The color changing light lets you know at a glance when the brew is complete, and when it is time to make more coffee. Plus, the internal placement of the sight glass means no cold-slugging of coffee, and no sight glass to clean!

GRINDMASTER®

PrecisionBrew® Coffee Solutions

Shuttle Sensors

Everything about the PrecisionBrew has been optimized to ensure health, safety, and easy operations. The sensor system will not allow brewing if the shuttle is not present or misaligned. Safety first!

Update via USB Drive

Every PrecisionBrew model is programmable locally on the machine, and updates can be made via USB. Eliminates the need to manually key in changes to every machine at every location requires less time in product start-up, travel, and management. Pre-programmed machines can also be transferred to different locations, ensuring a consistent process of brewing.

COFFEE BREWERS : SHUTTLE® COFFEE BREWERS
PrecisionBrew® Coffee Solutions

PrecisionBrew® Air-Heated Shuttle® Brewers

Maintain Delicious Flavor

Single and twin digital virtual sight glass models brew into 1.5 gallon air-heated Shuttle(s).

- Portable Encapsulair Shuttles insulate with air between the internal chambers, maintaining coffee temperature and flavor.
- Java-tate technology inside the shuttles gently stirs the brewed coffee at regular, short intervals, to keep undissolved particles in suspension, ensuring a consistent flavor profile from the first cup to the very last.
- The backlit, internal sight glass in the Encapsulair shuttle provides an LED readiness and freshness indicator for the brew. The color changing light lets you know at a glance when the brew is complete, and when it is time to make more coffee.
- The internal placement of the sight glass means no cold-slugging of coffee, and no sight glass to clean!
- Advanced touchscreen digital interface simplifies and streamlines brewing and operation.
- Shuttle safety sensors prevent brewing when server is not in place.
- Standard electronic basket lock prevents basket removal during brewing and dripout.
- 3.2 gallon heating tank per brew head.
- (3) independent brew volumes of 0.5, 1.0, 1.5 gallons let you be prepared for a busy morning rush and eliminate waste during slower sales periods.

COFFEE URNS

COFFEE URNS

PrecisionBrew® Barista Series Urns

Signature Cup

PrecisionBrew® technology gives user complete control over the brew cycle, contact time, and brew temperature, and holds the water temperature to +/- 1 °F.

- Three independent batch-volume sizes per liner.
- Each batch can be programmed with pulse brewing feature.
- Dual wall, air-insulated, electropolished liners maintain steady temperature. Brews at 200°F, and holds coffee at 185°F.
- Programmable, energy-saving 'sleep mode' feature - every day can be individually programmed to be warmed up and ready to brew when you open, and turn off when you close.
- Low Temp - No Brew function.
- Coffee levels are displayed as an easy-to-read LED light graph.
- Automatic Air Agitation ensures that every cup has the same profile.

COFFEE URNS
Space Saver Urns

Of Course We Have Coffee!

Space Saver Coffee Urns are the hassle-free, automatic, and efficient way to produce premium quality coffee. With so many automatic features, and its constant brew temperature, preparing fresh coffee for a crowd has never been simpler.

- Fully automatic, push-button operation.
- Brew temperature remains constant with less than 5° F variation.
- Dual wall fiberglass insulation saves energy and minimizes heat loss.
- Automatic coffee agitation and automatic refill/reheat of water.
- Low water cutoff system protects heating elements from burn out.

COFFEE URNS

Single Midline Pump Urns

One-Button Brewing

Effortless, automatic, and premium coffee are all possible! These solid performers are simple to use, dependable, and produce an exceptional cup of coffee.

- Pump type brewing system - water is heated in large water storage compartment. When brew button is activated, hot water is pumped over the coffee grounds through specially-designed solid cone spray nozzle, providing the most uniform extraction possible from the coffee bed.
- All A.I.S.I. type 304 18-8 stainless steel, single-wall construction.
- Automatic coffee agitation and automatic refill/reheat of water.
- Low water cutoff system protects heating elements from burn out.
- Half batch / full batch capability.
- Closed chamber brewing prevents escape of coffee vapors and loss of aroma and flavor.

COFFEE URNS

Single Midline Heat Exchange Urns

Reliable, Durable, Delicious

For energy-efficient brewing that will surpass the expectations of any coffee shop, try this unique fresh water brewing system. Saves energy while brewing premium quality coffee.

- Fresh water brewing - water is brought into the urn immediately before the brew, preventing any staling. The water passes through a heat exchanger coil, and is instantly heated to optimal brew temperature. Saves energy, and preserves taste!
- All A.I.S.I. type 304 18-8 stainless steel, single-wall construction.
- Automatic coffee agitation and automatic refill/reheat of water.
- Low water cutoff system protects heating elements from burn out.
- Velvet smooth spray arm - Teflon® coating on spray arm piston prevents liming and ensures smooth operation.
- Half batch / full batch capability.

High Volume, Tamper Resistant Urns

Secure and Stable

Designed with safety and protection in mind, this versatile coffee urn is tamper-resistant, eliminating any potential hazards or undesired access. And, it makes a great cup of coffee.

- All adjustable controls (timer, thermostats, sprayover flow control), are inside a lockable control box. Master on/off switch is behind a stainless steel, lockable panel. Control switches and pilot lights are protected behind a tamper resistant, 1" thick Lexan® cover plate.
- Exterior parts eliminated. Indicator lights replace gauge glasses. Water hot light replaces thermometer.
- Can be secured to countertop with flanged feet to prevent movement.
- Potential burn hazard eliminated with insulated body of two layers of high-density fiberglass.
- Two independent brewing systems allow for simultaneous or separate brewing into the 10 gallon liners. Brew heads located under hinged lockable covers.
- Two permanent stainless steel baskets with screens make paper filters optional rather than required.

Model	67710E (A67710E)
Description	(2) liners, 10 gallons each
Electrical	120/208V / 15 kW / 72A / 1 Ph Line cord not included.

High Volume, High Speed Urns

Speed and Service

You will always be ahead of high demand even during the busiest of times with this high speed, high volume crowd-pleaser.

- Simultaneous two-side brewing - water is heated and sprayed over the grounds by two independently controlled water pumps.
- Durable, insulated, double-wall construction - all A.I.S.I. type 304, 18-8 stainless steel.
- Constant brew temperature - brew temperature varies less than 5° F throughout spray-over.
- Automatic coffee agitation - thoroughly mixes brewed coffee immediately after spray-over is completed.
- Water compartment automatically refills and reheats as needed.
- Low water cutoff system protects heating elements from burn-out.
- Teflon® coating on spray arm prevents liming and ensures smooth operation.

ICED TEA BREWERS AND DISPENSERS

Front of House Stainless Steel Tea Dispensers

Streamlined and Elegant, With No Liner Required!

The attractive finish is polished and professional. It's large 3 gallon capacity is perfect for self-service beverage areas. Simple to use, easy-to-clean, hard-wearing. We are still trying to find something we don't like about these dispensers.

No Liner Needed

Passivated interior and exterior protects the flavor of the beverage, and **does not require the use of a liner**. This makes these dispensers easier to clean and sanitize than plastic urns on the market, with substantial cost savings and environmental benefit.

Rugged Construction

Stainless steel construction and faucet connection withstands heavy use, is rust resistant, and easy to clean. Laser welds are heavy duty, stand up to repeated use, and resist leakage.

Easy Brewing and Dispensing

Fits under most commercial brewers - just remove the lid and brew directly into the dispenser. With four dispensers to choose from, you can select the perfect one for your usage.

Cleaning Made Simple

All parts and components are removable, allowing it to be easily and thoroughly cleaned.

Effortless Transportation

Stainless steel handles make it easy to lift and carry.

9 ½" Cup Clearance

Easily fill large to-go cups or tall iced tea glasses.

Slim Design, Considerable Capacity

Its large 3 gallon size guarantees that your drinks will be in good supply, and its compact design allows it to easily fit where you need it, and not waste much-needed counter space.

ICED TEA BREWERS AND DISPENSERS

S Series Stainless Steel Tea Dispensers

Cool and Easy

The S Series Stainless Steel Tea Dispensers are perfect anywhere you or your customers need easy access to delicious iced tea. Featuring Tomlinson no-drip faucets to protect from potential drips and spills, the series offers dispensers from 2 - 10 gallons in size, with or without handles.

They provide an impressive 7" - 9" high faucet clearance, allowing ample room for serving your delicious fresh-brewed iced tea into tall glasses, to-go cups, and beverage pitchers. When finished serving, its cylindrical design makes cleanup quick and easy.

HOT TEA URNS

HOT TEA URNS

Chinese Hot Tea Urns

Hot Tea Made Simple

The Chinese Hot Tea Urn is a twin style unit with 3 gallons in each urn, for a total capacity of 6 gallons. A seamless urn liner and silicone fittings prevent corrosion, pitting, and leaking, and enable the urn to withstand constant use. The urn automatically fills with water thanks to the solid state dual water level controls. Construction of stainless steel makes it durable, easy to clean, and reliable. Tea can be brewed in half or full batches to ensure minimal end-of-day waste.

- Silicone fittings prevent corrosion, pitting, and leakage.
- Type 304L stainless steel single-wall construction.
- Solid-state dual water level control.
- Thermostat sensor at side box for easy access and service.
- Seamless urn liners standard.
- Easy changing of the water pump or thermostat- no need to empty urn completely.
- Provides (2) brew cycle choices, full batch and half batch. Full batch standard, half batch optional.
- Electro-mechanical timer, adjustable by-pass, push-button agitator.

POWDERED BEVERAGE
DISPENSERS

Radiance® Powdered Cappuccino Dispensers

Simply Smarter Beverage System

This top-of-the-line cappuccino delivery system ensures perfect, consistent beverages with each use, and with five hoppers, there is a great variety of flavors for customers to choose from. With a durable steel construction, this dispenser is built to withstand the hustle and bustle of busy commercial use.

- Choice of merchandisers
- 8.5" cup clearance.
- 5 hoppers, with 5 pounds capacity per hopper.
- 7.25 gallon tank capacity.
- 4" leveling legs.
- Removable drip tray.

Radiance provides real-time, actionable usage data on your customers' preferences that you can use to improve your business.

An online dashboard provides detailed information about the machine, including:

- Dispense information
- Overall machine status

And, it creates presentation-ready charts and allows export of data into Excel.

Wi-Fi enabled GrindmasterConnect

lets you remotely monitor, configure, and update individual or large fleets of Radiance machines simultaneously. It provides real-time email or text notifications updates of preventative maintenance reminders, low powder alerts, error notifications, and overall machine status.

Put an end to equipment downtime.
Better manage inventory and reduce waste.
Never be out of touch, no matter where you are.

POWDERED BEVERAGE DISPENSERS

Radiance® Powdered Cappuccino Dispensers

Wi-Fi Enabled With GrindmasterConnect™

Provides Real-time Actionable Usage Data

Maximize Profits: Understand and respond to customer preferences.

Reduce Waste: Machine status and usage reports (both live and historical).

End Downtime: Push notifications of equipment alerts.

Trusted Technology: Partnered with Kitchen Brains.

Safe and Secure: If the internet connection goes down, all data will be safe, and the machine will still be fully functional.

POWDERED BEVERAGE DISPENSERS

GB Powdered Beverage Dispensers

Delicious Flavor, Optimal Variety

Let your customers have their choice of mixed hot beverages, from a single flavor all the way up to eight flavors per model! And, with Fast Flow, these delicious beverages will dispense 30% faster, reducing wear and tear on major dispenser components.

A slanted whipper chamber thoroughly mixes your beverage into a creamy drink for optimum flavor and body, while keeping mixing powder away from the motor seal, and a direct drive auger adjusts beverage strength, guarantees perfect hopper alignment, and allows for quiet operation.

The GB Series of Powdered Beverage Dispensers guarantees that you have the right variety of high-quality beverages for any customer's taste!

- Vacuum Steam Removal System ensures the powdered mix remains dry, to eliminate clogging, caking, and bridging.
- Moisture and powder collection tray prevents excess moisture and product powder from reaching the vacuum motor.
- Self cleaning rinse system is touch-button easy and rinses the entire whipper chamber with hot water at the end of each cycle.

ESPRESSO MACHINES

Super-Automatic One-Step with Powdered Milk

Barista Quality Drinks at the Push of a Button

Ideal for direct-to-public dispensing, serving up to 100 drinks daily. The user selects the drink they want, and the machine does the rest: doses the beans, grinds them, loads and tamps the portafilter, pulls the extraction using the right water temperature and water volume, and mixes in the milk or other solubles to deliver the completed drink. The machine then ejects the grounds into an internal reservoir, and then runs a quick cleaning cycle on itself so it's ready for the next customer.

No operator skill required, exceptional quality, consistency, and variety of drinks, and the small footprint doesn't take up a lot of space. Profitable addition to any existing beverage program or an easy entry point into the specialty beverage market. Perfect choice for cafeterias, refreshment areas for business, education, hospitals, offices, foodservice, bagel shops, bakeries, and clubhouses.

- 8 programmable drinks
- 7 programmable adjustments for every drink
- Coffee bean hopper and 2 soluble hoppers
- Back-lit, touch sensitive selection panel
- Fits up to 9.45" cups
- Quiet running at <70 dB

Visit www.GrindmasterEspresso.com for more information.

ESPRESSO MACHINES

Korinto Prime

Super-Automatic One-Step with Powdered Milk

Preventive Maintenance Kit

1 Year Schedule
Item: 250-00139
List Price: \$ 640

See Page 228

Model	Korinto Prime (1005-003)
Description	(1) 2.1 lbs. (950 g) coffee bean hopper and (2) soluble hoppers with (1) 20.3 oz (0.6 L) boiler.
Dispense Volumes	8 oz, 10 oz, or 12 oz
Capacity	Small to medium capacity, up to 100 drinks daily
Plumbing	Pressure between 7.3 and 123.3 psig.
Electrical	120V / 1.4 kW / 12A / 1 Ph NEMA 5-15P line cord included.

Ship Dimensions (H x W x D)	32" X 16" X 24"
Ship Weight	72.75 lbs.
List Price	\$ 8,787

OPTIONS

Installation Package (80598) - Required for the Korinto Prime to qualify for factory warranty. See page 139.

Base Cabinet (250-00015) - For use with Korinto Prime. See page 136.

Cup Warmer (250-00016) - Cup warmer with 2 shelves. Will hold 40 standard espresso cups or 24 standard cappuccino cups. See page 136.

Note: Installation of this model must be performed by a Grindmaster-Cecilware certified service provider, and water filtration must be utilized to qualify for factory warranty.

ESPRESSO MACHINES

Tango Milk Series

Super-Automatic One-Step with Real Milk

Automatically Delicious

Exceptional quality in a variety of drinks with little operator skill. Two models can be public-facing in some areas. Push a button and the machine will grind the beans, pull the extraction, froth and steam its refrigerated milk, and add it into the drink. The STP models have the unique advantage of offering cold foam and cold milk as well as steamed and frothed warm milk. This gives the user the ability to make cold espresso-based drinks, and lets you expand your menu to cold milk drinks.

Touchscreen Interface Offers Programmable Control of:

- 48 drink recipes per grouphead
- 2 separate coffee grinds
- 2 pre-infusion methods
- Tamping
- Boiler temperature
- Coffee dose and water dose

Easy use makes it a great choice for locations where espresso is not the focus, or with seasonal employees. Perfect in cafés, cafeterias, offices, refreshment areas for business, education, and hospitals.

- Integrated SteamAir wand with auto milk foamer and programmable temperature control.
- Quick clean cycles every 90 drinks; complete group auto clean cycle every 24 hours.
- ACE L/C and STP Solo offer temperature regulation for steam and group. STP Duo also regulates brew temperature.
- Includes installation by a Grindmaster-Cecilware certified service provider and Purity C500 Water Filtration kit.

GRINDMASTER®

ESPRESSO MACHINES

Tango Series

Super-Automatic Two-Step

Loved by All

A beginning barista will appreciate the easy use, and a skilled barista will love the control. The beans are ground and espresso pulled by the machine, but the user mixes the steamed or frothed milk and other flavorings for each drink.

Programmable Automatic SteamAir wand controls the temperature and foam time to create the perfect milk to add to each drink, which gives you more control over amount and type of foam, froth, and milk in the drink, and lets you steam non-coffee drinks like chai tea and hot chocolate.

Touchscreen Interface Offers Programmable Control of:

- 48 drink recipes per grouphead
- 2 separate coffee grinds
- 2 pre-infusion methods
- Tamping
- Boiler temperature
- Coffee dose and water dose

Produces a delicious drink even with an operator who has only basic skills, and offers more skilled baristas greater variety and control. Made-to-order for cafés, hotels, bakeries, coffee shops, cafeterias, restaurants, drive-thrus, or foodservice.

- Programmable hot water dispenser for other hot drinks.
- Quick clean cycles every 90 drinks; complete group auto clean cycle every 24 hours.
- Includes installation by a Grindmaster-Cecilware certified service provider and Purity C500 Water Filtration kit.

ESPRESSO MACHINES

Pony Series

Pod Super-Automatic Two-Step

Pod Perfection

Using 45mm ESE coffee pods to pull espressos, and the automatic SteamAir wand to create just-right milk foam, these machines are ideal where quality and consistency are vital, despite multiple users or employee turnover.

Automatic SteamAir wand is pre-programmed to foam milk, controlling temperature and foam time. User mixes the milk and any other flavorings into the drink. The SteamAir wand gives user more control over amount and type of foam, froth, and milk in the drink, and allows for non-coffee drinks like chai tea and hot chocolate to be created.

Touchscreen Interface Offers Programmable Control of:

- 6 volumetric water settings per grouphead
- Pre-infusion

Excellent for locations such as cafés, restaurants, bakeries, smaller coffee shops, bed & breakfasts, and hotels, and the perfect choice for catering.

- Programmable hot water dispenser for other hot drinks.
- Quick clean cycles every 90 drinks; complete group auto clean cycle every 24 hours.
- Includes installation by a Grindmaster-Cecilware certified service provider and Purity C500 Water Filtration kit.

GRINDMASTER®

ESPRESSO MACHINES
Classic Series
Automatic Espresso Machines

Easy Espresso

Offer a great balance between user customization and providing ease-of-use with the automated features. Allows the user to manage the grind, dose, and tamp of every drink, while the machine takes care of the extraction. Preset volumes are programmed for a variety of drinks, guaranteeing consistent shots every time even with different baristas. A manual override button lets the operator control the shot size, allowing for custom drinks. Barista can multi-task and steam milk while shot is being pulled, allowing for better productivity.

PID Temperature Control System: PID is shorthand for proportional-integral derivative controller. It is a precise computer that controls the heating element, providing exacting control of water temperature (single-degree increments) and exceptional temperature stability.

An exceptional machine to be enjoyed in coffee-focused environments, such as coffee shops, cafés, restaurants, bakeries, and college campuses.

- Separate water and pressure gauges for easy and precise monitoring.
- Separate independent auto back-flushing allows convenient machine maintenance.
- PID control provides boiler temperature stability at 217.4° F.
- Custom grouphead - closed circuit of water goes through the boiler, heating and maintaining the temperature of the grouphead at steady 199.4° F.
- (4) programmable and (1) manual drink volume buttons per grouphead, with duplicable pre-programmed dosage.
- Hot water dispense wand and steam knob feature two easy-to-use methods of operation, either rotating or pull-out operation.

OPTIONS

Installation Package: (80598)
Required for the Classic Series to qualify for factory warranty. See page 139.

Note: 4" clearance required on side and rear.

Note: Installation of this model must be performed by a Grindmaster-Cecilware certified service provider, and water filtration must be utilized to qualify for factory warranty.

ESPRESSO MACHINES

Mira Series

Automatic Espresso Machines

Extraordinary Flexibility for an Automatic!

Incredibly versatile MIRA series can switch from standard groupheads to pods and capsules for more automation, then quickly switch back again. Allows the barista precise control over the grind, dose, and tamp of every drink, while the machine takes care of the extraction. Or, switch to more automation and ease with pods!

Preset volumes are programmed for a variety of drinks, guaranteeing consistent shots every time even with different baristas. A manual override button lets the operator control the shot size, allowing for custom drinks. Barista can multi-task and steam milk while shot is being pulled, allowing for better productivity.

- 4 programmable volumes plus manual per grouphead.
- Hot water dispenser for additional drinks.
- User monitors and adjusts for correct brew and steam temperature.
- Automated back-flushing cycle for daily cleaning.
- Integrated running shot timer.
- Solid Teflon steam wands for easy cleaning.
- Direct-to-boiler mounted grouphead for shot temperature stability.
- Twin pressure gauge for pump and steam.
- Diagnostics display for easy trouble shooting.
- Includes installation by a Grindmaster-Cecilware certified service provider and Purity C500 Water Filtration kit.

GRINDMASTER®

ESPRESSO
GRINDER-DOSERS

Venezia Espresso Grinder-Dosers

Precise Control

Heavy-duty, high-torque, direct drive grinder-dosers with infinite grind adjustments and exacting precision. These grinder-dosers allow your shop to make it through a rush without having to stop and grind coffee for each drink.

- VGT offers a timer version: set the timer to start the grind, machine turns off automatically after time is up. Timer can also be stopped manually. 1 minute maximum grind.
- VGA and VGHDA offer automatic versions: doser chute is always kept full, ready for dispensing. Auto starts every 12 doses, the grinder stops when the chute is full.
- Direct drive, 1600 rpm motor.
- Overheating safety protection.
- Dose adjustment: 5.5g - 9g.
- Shot counter on doser indicates the number of cups of espresso that have been served.

Visit www.GrindmasterEspresso.com for more information.

HEATED DISPENSERS

HEATED DISPENSERS

Lola Series Hot Dispensers

Thick, Rich, and Hot

Perfect for heating and dispensing thick chocolate, hot cider, and other hot beverages. Use as a heated dispenser for mixtures with no particulates that need to be served warm and require agitation to prevent separation.

- Adjustable thermostat up to 194° F.
- Vertical tap for free flow. Easy to clean and disassemble.
- Transparent bowl encourages impulse use.
- Attractive design allows for use in any location: as a counter-top dispenser, in the buffet line, or in the kitchen.
- Easily removable bowl even when full for refrigerated storage.

Note: Clearance of 8" required on all sides.

HEATED DISPENSERS

Syrup Warmers

Wonderful Hot Syrup

Everyone loves a hot breakfast of fresh pancakes, waffles, or French toast. But the best part is always the sweet, hot, flowing syrup.

These heated syrup dispensers hold 1 or 2 gallons of heated syrup at a constant temperature of 125 degrees Fahrenheit. At this temperature, syrup will stay thick and warm, but won't crystallize. Stable and durable stainless steel body with secure faucets that will prevent sticky drips on your countertops.

Model : SD1

Model	SD1 (437100L)	SD2 (437200L)

ORANGE JUICE MACHINES

ORANGE JUICE MACHINES

Automatic Orange Juice Machines

Quick, Efficient, and Juicy

The exclusive design of the juicer separates the peel from the pulp, so that it is not pressed during the squeezing process. The peel never touches the juice, ensuring sanitation.

- Micro-serrated slicing blade - heavy-duty stainless steel blade strong enough to quickly slice through the thickest peel.
- Available carousel-style automatic feeder - fruit is automatically fed into the machine quickly and efficiently as the feeder rotates.
- Fruit Diameter: 2.36" - 3.2"

COLD BEVERAGE DISPENSERS

Less Equals More

Simplicity pre-mix dispensers are the first machines that are proud to offer less. Less counter space with their compact size. Less time and effort in cleaning and disassembly. Less wear and power usage. Less waste, with product dispensed to the last drop. Less worry with fewer removable parts. And, less maintenance. Which we believe gives you much, much more.

- Pre-mix dispenser with stainless steel base and clear plastic easy-clean bowls.
- Spray or Agitation model available.
- Unique to Simplicity more efficient front-to-back air circulation. Efficient cooling uses less energy and saves money.
- New easy-off bowl release system for faster and easier assembly and disassembly.
- Design enables machine to dispense product until the very last drop.
- Fewer removable parts to simplify cleaning and reduce maintenance, including removable tray.
- 9" cup clearance for a variety of drinks.
- Temperature range from 35 - 41°F.

Simplicity® Bubblers®

Sleek Design

Dispense up to four flavors in 2.4 or 4.75 gallon clear plastic bowls on a stainless steel base with 9" cup clearance.

Agitator and Spray Models

Choose the minimal foaming system in the agitator model or the attractive dynamic cascade of product in the spray model.

Interchangeable Bowls

Different size bowls fit the same machine!

Easily convert your Simplicity Bubbler to the best bowl configuration for your needs.

Wherever you have two 2.4 gallon bowls on a Simplicity base, you can replace them with a 4.75 gallon bowl and vice versa.

Note: The Triple Tall Models (CS-3L Series) are not interchangeable. Can't exchange between spray and agitation types of machine.

COLD BEVERAGE DISPENSERS : PREMIX
Simplicity® Bubblers®

Reduced Maintenance

Fewer removable parts also means less maintenance and a longer lifetime.

Dispense Levers

Dispense levers can be removed quickly and easily without affecting the product dispense valves.

Easy and Better Sealing

Advanced sealing guards against leakage, providing trouble-free usage.

Durable and Efficient

Keep a steady supply of cold drinks on hand with Crathco Classic Bubbler cold beverage dispensers. Stainless steel and super-strong, virtually unbreakable polycarbonate bowls and covers ensure long-lasting use, and are easy to maintain for a fast, simple cleanup. Crystal-clear bowls and covers showcase your colorful signature fruit juice, tea, and iced coffees and provide an eye-catching appearance - perfect for boosting impulse sales.

- Unique evaporator and high efficiency pump cools faster and more efficiently for quick start-up.
- Along with spray circulation, agitators are included with each unit for fresh juices, coffees, or tea.
- Superior engineering allows full beverage cooling to the dispense point, and right down to the last drink.
- Bowls have easy-to-read measuring marks and models with more than one bowl separate to allow cleaning and flavor changes without total system shut-down.
- Temperature range from 35 - 41°F.

Liquid Autofill System for Bubblers®

Drinks Always Ready

Increase productivity beyond bowl capacity in your cold beverage machine! Automatically refills bowls as the product drops below preset level. Placed between the dispensing bowl, liquid concentrate, and a potable water line, the autofill system mixes the liquid concentrate and water together and refills the bowl. Safeguard controls prevent the overfilling of the bowls.

- Use with the Simplicity series, and the Classic series models D15, D25, D35, E29, and E49.
- Unit includes: Sanitizing system, digital control system, power cord, and 72" each of concentrate tubing, dispense tubing, and sensor probe cable.
- Compatible with liquid box products used to create cold or frozen drinks.
- Automatic shutdown at power failure.
- Input and output water tubing attached with quick connects.
- Output: 1.5 - 2.5 oz per second at 32 psi outlet pressure maximum.
- Output in sanitizing mode: approximately 3 gallons per minute.
- Pre-drilled bowls required.

Crathco® G-Cool® Series

So Many Options - Even Safe for Milk!

The most advanced, user-friendly cold premix dispenser available, for up to 4 flavors with options of both 2.4 and 5 gallon bowls. Easy operator interface, simple machine care, and faster cleaning. Cleans in half the time of a traditional dispenser. Patented Tri-Cool™ evaporator with a large 3-sided cooling surface refrigerates through the bowl using less energy and saving money. Low aeration magnetic mixing system keeps product mixed without creating unwanted foam in tea and cappuccino products.

- 360° merchandising with choice of fruit, tea, or cappuccino graphic attract customers.
- Stainless steel dispensing valve and 9.5" cup height.
- Temperature range from 35 - 41°F.
- Certified NSF / ANSI 20 - safe for milk.

HAND MIXERS

Hand Mixers

Effortless Power

Easy-to-use handheld stick blender, designed for heavy-duty usage. Lightweight, ergonomic grip, stainless steel tube, and 9 adjustable speeds make tasks fast and easy, and the space-saving wall mount makes it convenient! All parts in contact with food are easily disassembled without tools and 100% dishwasher safe.

- Visible and waterproof control panel adjusts speed and has overload indicator warning.
- Safety feature requires both hands to start the mixer.
- Bell knife design with antisplash protection and minimum handling during working.
- Shaft locking device avoids release during operation.
- Double fan system to cool motor.
- Water protected motor unit.
- BPA free.

Model	DBP4545 (2801-000)
Description	With 18" stainless steel tube Capacity up to 26 gallons Variable speeds up to 9,000 rpm

FROZEN BEVERAGES
AND DESSERTS

I-Pro Frozen Granita Dispensers

Introducing the most advanced professional slush, sorbet, and granita machine in the world. Even safe for milk!

High performance, ultramodern design, and user-friendly. Insulating technology increases cooling power, saves energy and money, and reduces external condensation. Choose from either (2) or (3) 2.9 gallon insulated bowls with either mechanical or electronic control board and timer, and optional light panel.

Perfect solution for restaurants, coffee shops, bars, amusement parks, convenience stores, kiosks, and much more.

- All models are certified NSF-6 safe for milk.
- Transparent bowl encourages impulse purchasing.
- Manual defrost mode.
- Efficient safety mechanism is activated when cover is lifted. All moving parts automatically and immediately stop.
- Lockable lid.
- Adjustable product consistency.
- Black finish.
- Commercial grade parts ensure a long life in heavy-usage locations.
- Repairable machine with available replacement parts.

Frosty Frozen Granita Dispensers

Perfect for Indoor or Outdoor Use

Frosty Frozen Dispensers are the go-to model when you want large-sized, high-performance equipment, without a high investment. Slushes, sherbets, and other frozen treats are created with a double mixing system that prevents ice accumulation, for optimum product consistency that is also adjustable. The black and stainless steel finishes and illuminated lid encourage impulse purchasing.

- Efficient safety mechanism is activated when cover is lifted. All moving parts automatically and immediately stop.
- All models are certified NSF-6 safe for milk.
- LED illumination system.
- Manual control keypad.

NSF-6

3000 and 5000 Series Crathco® Barrel Freezers

Industry Workhorse

Serves a variety of frozen smoothies, frozen cappuccinos or lattes, granitas, frozen fruit juices, frozen lemonades, slushes, or cocktails. Your delicious drinks are continually replenished in the barrel by a large product reservoir, and a mix low light alerts you when the reservoir needs to be refilled. Patented FlavorLight™ illuminates your beverage with your choice of eye catching back-lit signs that draw customers and increase sales.

The oversize drive motor, sturdy belt drive, and heavy-duty stainless steel frame construction will stand tough against years of high volume use. Individual controls allow you select on/off, clean, and mix out for each barrel so you can easily maintain your machine for consistent dispensing and long life.

This space-saving unit is great for self-serve applications or behind-the-bar service, providing you with everything you need to serve a variety of delicious frozen treats!

- Heavy-duty components provide lasting commercial use.
- Compact units provide big service. Single barrel models are only 13" wide, and double barrel models are only 18.5" wide, but they more than double the output capacity of visual beverage freezers.
- Mechanical control in the 3000 Series.
- Electronic control in the 5000 Series.

The customer must provide the following for installation:</p> <ol style="list-style-type: none"> 1. Appropriate electric service within 4 feet of the machine's location for electric hook-up including appropriate heavy duty grounded receptacle with its own breaker. 2. Access to cold water with a minimum of 30 psi pressure with adequate shut-off valve within 6 feet of the machine's location on units requiring water line hook-up. 3. Adequate drain availability for flexible drain hose on units requiring water line hook-up. 4. Adequate and appropriate space to position unit 	
List Price	\$ 929*	\$ 1,392*

* Additional charges (i.e. removal of old equipment, work required to reach compliance with installation requirements above, travel time outside stated radius, or other expenses outside a normal installation situation) are the responsibility of the customer. Contact the factory for special Start and Adjust pricing for multiple units in one location.

SP Series Frozen Granita and Ice Cream Dispensers

Ice Cream and Frozen Coffee

One compact counter machine creates both chilled beverages like frozen coffee, fruit juices, frozen cocktails, and creamy desserts, like mousses, ice creams, slushes, sherbets, and sorbets. Functions with both water or milk added to dried base or with ready-to-use mixed product bases to create delicious chilled treats. Easy to clean and user-friendly, this is the perfect solution for restaurants, cafeterias, coffee shops, bars, or hotels.

- Easy disassemble without tools for cleaning.
- Lockable lid.
- Mechanical control board.
- Manual defrost mode.
- Digital display shows the bowls temperature.
- All models are certified NSF-6 safe for milk.

COOKING EQUIPMENT

Floor Model Gas Fryers

40, 50, and 70 lbs.

Sleek and Solid

Constructed of heavy-duty stainless steel for long life and easy maintenance, the new Cecilware Pro line of gas floor fryers are built using the best components the industry has to offer. Offering heavy-duty construction at value prices, these tube fryers are ideal for heavy volume restaurants. The deep cold zone meets the demand for healthier foods by preventing the breakdown of oil, and maximizes savings by prolonging oil life span.

Equipped with multiple safety features, and available in either natural or LP gas, with Invensys® thermostat rated at 200 - 400° F, and an auto reset high limit, these fryers also make the job simple!

- Models available using natural or LP gas.
- 6" adjustable legs.
- Two nickel chrome wire mesh fry baskets included.
- Fry pot depth of 30.25".

Floor Model Electric Fryers

40 and 65 lbs.

Efficient and Delicious

Built for long-lasting durability and easy use, these heavy-duty electric fryers feature mechanical temperature controls and high-energy incoloy heating elements with 1.8 kw of power for easy temperature control and fast recovery.

- Economical to operate at maximum efficiency with a balanced electrical load.
- Trouble-free, low watt density, fixed elements.
- Robertshaw high limit and automatic temperature controls ensure accurate and safe fryer operation, conserve energy, and save money.
- Tough unibody construction.
- Controls are easy to service and accessible from the front.
- Melt cycle controls standard on all 65 lbs. models.
- Stainless steel door and body construction on 40 lbs. models.
- Stainless steel door, body, and tank on 65 lbs. models.
- Heavy-duty legs.

COOKING EQUIPMENT : GRIDDLES
Medium Duty Gas Griddles

Professional Results

The ultimate in flexibility for your kitchen! Available in four widths with manually controlled, independent cooking zones and a polished steel cooking surface for the best results in grilling.

- All models can be operated using natural or LP gas. Models ship as natural gas unit with no additional parts necessary for conversion.
- Griddle plate thickness of 1" for better heat retention, faster recovery, and more even heat distribution than thin plates.
- Heavy-duty stainless steel full-cooking depth dual-ported burners for long life and easy maintenance.
- Manually controlled, independent cooking zones.
- Bottom-welded plate for accurate heat distribution.
- Non-welded top plate ensures uniform temperature consistency on cooking surface.

Thermostatic Gas Griddles

Exact Temperature

Unlike manual griddles that only have temperature ranges, thermostatic griddles can be set to an exact temperature, and will maintain that temperature within a couple of degrees.

- All models can be operated using natural or LP gas. Models ship as natural gas unit with no additional parts necessary for conversion.
- Griddle plate thickness of 1" for better heat retention, faster recovery, and more even heat distribution than thin plates.
- Heavy-duty stainless steel full-cooking depth dual-ported burners for long life and easy maintenance.
- Manually controlled, independent cooking zones.
- One U-shaped burner and thermostat control for every 12" of cooking surface to maintain even heating.
- Throttling thermostat provides a consistent surface temperature and superior food quality.
- Non-welded top plate ensures uniform temperature consistency on cooking surface.

TERMS AND CONDITIONS

Domestic Equipment Warranty

Effective January 1, 2019

Within warranty periods, Grindmaster-Cecilware will at its option, after troubleshooting directly with customer site, repair or replace a defective unit at no charge for parts or labor during the applicable parts or labor warranty period, Grindmaster-Cecilware's obligation under these warranty periods shall be limited to repairing or replacing any part of said equipment (excluding plastic parts, rubber parts, light bulbs, or normal wear items) which proves defective within the warranty period. Warranty start date is from the original ship date of the equipment or date of sale to the customer with proof of sale, if within 12 months of ship date. Units replaced under warranty will retain remaining warranty term of original unit.

This warranty is subject to the following conditions, terms, and exclusions:

- Warranty must be activated by online registration at www.gmcw.com.
- All Warranty claims must be pre-authorized by Grindmaster-Cecilware Technical Services by calling 1-800-695-4500 (opt 2) or by email at TSMailbox@electrolux.com.
- RC400 - 1 year parts and labor.
- Grindmaster-Cecilware dispensers, Accessories and Parts - 90 days replacement only.
- Warranty does not apply to machines or any part thereof which have been subject to any; accident, abuse, misuse, neglect, alteration, non-compliance to owners manual and preventive maintenance requirements, use on incorrect voltage, lack of gas pressure, improper ventilation, damage caused in transit, improper installation or operation, improper maintenance or repair, normal wear items, plastic or rubber parts, poor water conditions, machine adjustments, temporary non-functioning conditions, fire, flood, or acts of God; Warranty is in lieu of all other warranties expressed or implied. In no event shall Grindmaster-Cecilware be liable for consequential or incidental damages. If service agents cannot access equipment (e.g. Food truck) customer is responsible for bringing unit to agent for warranty repair.
- Service Agent travel up to 50 miles is covered.
- Equipment is not intended for residential use and warranty service will not be dispatched to a residential address.
- Poor water conditions is defined as water not meeting the following criteria:
 - Total Dissolved Solids: Minimum 50 PPM, Maximum 125 PPM
 - Total Hardness: Minimum 3 GPG, Maximum 5 GPG
 - pH: Minimum 6.5, Maximum 7.5
 - Free Chlorine: Maximum 0.5 PPM
 - Total Chlorine: Maximum 1 PPM

Domestic Equipment Warranty

- Grindmaster-Cecilware reserves the right to be reimbursed for service calls deemed Non-Warranty. Authorized service agents (ASA) reserve the right to secure credit card information prior to dispatching a service call. In the case where the ASA deems a service call to be non-warranty, the service invoice is the responsibility of the end user. The warranty on the unit will be voided until the balance is reimbursed.
- If Grindmaster-Cecilware Service Agents are prevented from performing or completing service by the customer, if the customer refused service in part or whole, the warranty shall be considered void.
- Upon request by Grindmaster-Cecilware, some warranty parts, (including but not limited to: motors, compressors, micro-controlled based boards, gear motors, and burrs) shall be shipped prepaid to the Grindmaster-Cecilware Factory Service Center designated in the RGA confirmation. Upon receipt, Grindmaster-Cecilware will inspect parts to verify warranty claim is valid. Replacement parts will be billed out when shipped, and then credited on return of a part that is proven to be a valid warranty claim upon inspection by Grindmaster-Cecilware. Warranty labor will not be paid until warranty claim parts are received and validated by Grindmaster-Cecilware.
- Upon request by Grindmaster-Cecilware, the defective equipment shall be shipped prepaid to the Grindmaster-Cecilware Factory Service Center designated in the RGA confirmation.
- No field (including travel), outside or service station work is covered by this warranty without prior authorization by the Grindmaster-Cecilware Service Department.

The dealers, distributors, employees, and agents of Grindmaster-Cecilware are not authorized to modify this warranty or to add warranties that are binding to Grindmaster-Cecilware. Neither written nor oral statements by such individuals establish warranties and thus should not be relied upon. This will establish your warranty rights. The purchaser's redress against Grindmaster-Cecilware for the breach of any obligation arising from the sale of this equipment, whether derived from warranty or elsewhere, shall be limited to repair, replacement or refund at Grindmaster-Cecilware's discretion.

PREVENTIVE MAINTENANCE

Requirements and Frequencies

Category 1:

Care and Use Per Frequency Specified in Operators Manual

- Coffee Grinders
- Coffee Brewers (except RC400)
- Hot Water Dispensers
- Liquid Autofill Systems
- Cooking, Warming, and Cooling Equipment

Category 2:

Onsite Preventive Maintenance through Grindmaster-Cecilware

Recommended to be scheduled and completed within 30 days of one-year anniversary of purchase through Grindmaster-Cecilware Technical Service. To schedule, contact Grindmaster-Cecilware Technical Service by email at TMailbox@electrolux.com.

- Urns and Hot Water Heaters

Category 3:

One Year Preventive Maintenance Schedule

PRODUCT CERTIFICATIONS

Domestic Certifications

Grindmaster-Cecilware strives to design, create, and deliver the highest quality beverage and cooking equipment to help you build your business. Sanitation, safety, quality, and public health are critical. That is why Grindmaster-Cecilware works with numerous independent, third-party testing and certification organizations to simplify your search for superior equipment. Below are the certifications and marks that we refer to in this catalog, along with a brief description of the standards used to provide certification.

UL

Underwriters Laboratories (UL) is an independent, not-for-profit, nongovernmental organization that has been testing products for public safety for more than a century and has developed more than 1,000 safety standards. UL serves a wide range of customers including manufacturers, retailers, consumers, and regulating bodies.

UL Certification

The UL Certification symbol can be found on products in compliance with UL's safety standards and U.S. safety requirements.

C-UL US Certification

The C-UL US Mark indicates that a product meets the testing standards for UL listing, as well as applicable regulations on that type of product in the United States and Canada. The Canada/US UL mark is optional, but UL encourages those manufacturers with products certified for both countries to use this new, combined mark.

NSF

NSF (National Sanitation Foundation) International is the only third-party testing organization to undertake a complete evaluation of every aspect of a product's development for public health and safety, quality, and sanitation. NSF food equipment standards include requirements for material safety, to ensure the product will not leach harmful chemicals into food; design and construction, to ensure the product is cleanable and is not likely to harbor bacteria; and product performance. As part of the certification process, the production facility is subject to unannounced plant inspections.

NSF Certification

The NSF Certification Mark on a food equipment product confirms that NSF has assessed and certified its conformity with the relevant NSF/ANSI food safety standards. Products with the NSF Mark receive guaranteed regulatory acceptance in North America and improved acceptance worldwide.

ELECTRICAL

NSF Electrical Certification

The NSF Electrical Mark certifies electrical safety certification and compliance with U.S. requirements.

C US
ELECTRICAL

cNSFus Electrical Certification

NSF is accredited by OSHA as a nationally recognized testing laboratory to provide electrical safety certification to various UL standards in a wide range of foodservice equipment categories. The cNSFus Mark indicates compliance with both Canadian and U.S. requirements.

NSF-20

NSF-20 Certification

NSF International, in conjunction with ANSI has created the NSF / ANSI 20 certification. This establishes minimum food protection and sanitation requirements for the materials, design, fabrication, construction, and performance of commercial bulk milk dispensers and their related components. This includes equipment designed to dispense servings of milk or milk products by manual or machine actuation. This standard does not apply to dispensing freezers (soft-serve machines), vending machines, or manual food and beverage dispensing equipment covered by the scope of other NSF standards.

The American National Standards Institute (ANSI) is a private non-profit organization that oversees the development of voluntary consensus standards for products, services, processes, systems, and personnel in the United States.

Domestic Certifications

ETL

ETL is the certification mark used by Intertek, a Nationally Recognized Testing Laboratory (NRTL) providing independent evaluation, testing, and certification of any electrically operated or gas- and oil-fired product. A product bearing the ETL listed mark is determined to have met the minimum requirements of prescribed product safety standards. Moreover, the mark indicates that the manufacturer's production site conforms to a range of compliance measures and is subject to periodic follow-up inspections to verify continued conformance. The ETL listed mark is the equivalent of the UL listed and CSA listed marks throughout the United States and Canada.

ETL Sanitation Certification

The ETL Sanitation Mark indicates a product meets applicable requirements for food safety. To achieve it, the item must pass tests by ANSI/NSF standards and the certification shows production conforms to compliance measures for ensuring a food-safe product. Facilities are inspected on a regular basis to verify those standards continue to be met. The ETL Certification with "sanitation listed" inscribed on the bottom of the circle signifies that the product has been tested and deemed compliant with product safety standards.

ETL Certification - United States

A product bearing the ETL Certification with the U.S. mark has been tested and deemed compliant with U.S. product safety standards.

ETL Certification

An ETL Certification Mark signifies that the product complies with both U.S. and Canadian product safety standards.

CSA

CSA (Canadian Standards Association) International is an independent, not-for-profit member-based association that tests products for compliance with national and international safety and performance standards. CSA Group is recognized and accredited in the U.S. by OSHA, which enables them to use the U.S. standards written or administered by organizations including ANSI, UL, and NSF, among others.

CSA Certification

The CSA Mark signifies that the product meets applicable U.S. and Canadian standards, including those from CSA, CSA America, ANSI, ASME, ASSE, ASTM, NSF, and UL. If a product has features from more than one area (such as electrical equipment with fuel-burning features), the mark indicates compliance with all applicable standards.

CSA Star Certification Mark

Indicates that the product was tested and has met the certification requirements for gas-fired products in the United States.

CSA Flame Certification Mark

Indicates that the product was tested and has met the certification requirements for gas-fired products in Canada.
